Btech Mech, Class of 07

Doing MS in mechanical in UIUC

I did not apply for PhD anywhere :P

MIT Thermal and fluids(Combustion) MS *Reject*

Stanford Thermal and fluids(Combustion) MS *Admit*

UIUC Thermal and Fluids(Combustion) MS *RA/TA*

Gatech Thermal and Fluids(Combustion) MS *RA/TA*

PennState Thermal and Fluids (Combustion) MS *Fellow*

I chose top universities plus one back-up university, which is low ranked but very good in combustion (pennstate)

Top 5 universities are good in every field. UIUC has a very great program in thermal and fluids plus there is one professor whose work I have replicated in my BTP plus I got schol for MS here. So this place is very good for me. Other than that, I chose PennState coz it has a very nice program in combustion and also it served as a back-up for me.

It is very difficult to get scholarship in MS only, but since I was not interested in doing PhD, I applied for MS only. However, if you have a weak profile then you must apply for MS+Phd to get scholarship from top universities.

I had reco. from the three highly senior professors in this field from our department – JBD, KNI & AWD (I did my seminar and BTP under Prof. Date)

No fundae about suck mail.

No sharing of SOP. Do a google and u will get hundreds of SOP for free :P
